

Cloud Computing Center

Need help developing Federal IT and Web 2.0 systems?
Let us help. Call 888.302.4533 x701

After years of engineering scalable Web-based software systems, Virtual Global proudly opens its DC-area Cloud Computing Center...

The Hagerstown facility specializes in enterprise Web Software as a Service (SaaS) development, systems integration and cloud computing solutions for federal customers. The Center showcases a seasoned management team, astonishing new products, talented software engineers, scalable/secure data center and free resources for Web 2.0 developers.

Our managers are experienced with large-scale federal systems, Web architectures, commercialization and **health IT initiatives**. Meet the management team:

Cary Landis
founder and
senior architect

Sam Bonasso
federal growth
strategies

Greg Henthorn
commercial
strategies

Kathleen DuBois
marketing and
training
(progressity)

John Hale
corporate
development
and health IT

Specialists in cloud computing

Virtual Global has extensive experience with Web-based software engineering and cloud computing constructs including service-oriented architectures (SOA), virtualized servers, and cloud architectures (elasticity, multi-tenancy and utility computing). Also experienced with conventional enterprise computing using ASP.Net and SQL databases. **Customers include NASA Glenn Research Center, SAP America, Subaru America, University of Illinois, Seattle Police and more.**

Value-added products let us do more for your dollar...

The TeamHost™ Cloud Computing System helps us create your Web 2.0 Software in a fraction of the time, risk and cost... sometimes months rather than years! The open platform is ideal for building and integrating health IT, collaboration, and federal reporting systems. <http://www.teamhost.com>

TeamLeader™ is a Project Management 2.0 Software as a Service that monitors individual performance, and provides data collection/reporting capabilities. It is used by NASA, and ideal for Recovery Act tracking! <http://www.teamhost.net>

The Team

Our team has 10+ years experience with enterprise technologies, in the federal, commercial and academic sectors. Backgrounds include:

- NASA
- Health and Human Services
- Department of Transportation
- University of Illinois
- Seattle Police Department
- Duke University Medical School
- St. Francis Hospitals
- SAP America, Subaru America
- The Pampered Chef Headquarters
- NIST, FDA, EPA and others

Infrastructure

Software as a Service means that we manage your system admin headaches, so you can focus on whatever you do. Fully managed hosting by our partner Rackspace data center, secure and scalable to millions.

Security

Physically secured, 24x7 onsite staff, cameras, biometric access, dedicated firewall and VPN, ISO17799-based policies and procedures.

Contract Access:

- Simplified Acquisition
- GSA IT Schedule
- Credit Card
- Partner Vehicles
